

```

    <ol>
      <li>Complete the admin panel authorization system for subadmins</li>
      <li>Implement delivery charges functionality for food and lab
services</li>
      <li>Develop the clinic user module which is fully pending</li>
      <li>Address pending APIs in food, pharmacy, and lab vendor modules</li>
      <li>Plan implementation for fully pending modules (care program, science,
blog)</li>
    </ol>
  </div>
```

The DiabetesBala project is a comprehensive healthcare platform built with React for the frontend website and admin panel. The platform serves multiple user types with various functionalities related to diabetes care and management.

User Type	Status	Notes
Clinic User	Fully Pending	Entire module needs to be implemented
Lab User	Fully Pending	Entire module needs to be implemented
Pharmacy User	Fully Working	All functionalities are operational
Food User	Partially Working	Pending task: Add delivery changes functionality
Care Program User	Fully Pending	Entire module needs to be implemented
Science User	Fully Pending	Entire module needs to be implemented
Blog User	Pending	Implementation status unclear
Doctor User	Fully Working	All functionalities are operational
