Senior Java Backend Engineer with 6+ years of experience building scalable microservices in telecom and fintech domains. Specialized in Spring Boot, Kafka and Aerospike caching. Improved API performance by 60% and delivered production-ready systems used by millions of users

WORK EXPERIENCE

Senior Software Engineer Google

12/2021 - Present

Gurugram

Achievements/Tasks

- Improved REST API latency from **800ms** → **300ms** using Aerospike caching
- Implemented Kafka event-driven microservices for asynchronous workflows
- Awarded **Shining Star** for outstanding contribution
- Worked across multiple platforms, contributing to multiple cross-LOB microservices.

Software Engineer I Micosoft

04/2021 - 12/2021

Gurugram

Achievements/Tasks

- Developed optimized Spring Boot services with clean architecture & CI/CD
- Built GraphQL + Drools-based rule engine for dynamic business flows
- Developed microservices using Java, Spring Boot and REST APIs

Programmer analyst Cognizant

11/2019 - 04/2021

Pune

Achievements/Tasks

- Worked on backend services using Java, Spring, Hibernate, JPA and REST APIs.
- Fixed security issues like log4j vulnerability
- Implemented REST microservices using Spring Boot

PROJECTS

Google Drive Integrations (Backend) (12/2021 - Present)

Technologies : Java, Microservices, Spring Boot, JPA, Git, Kafka

- Backend application enabling external partners (e.g., PhonePe, Paytm) to consume Google product data. Led migration from DB-driven reads to API-based consumption, improving data freshness and eliminating sync inconsistencies. Implemented caching and monitoring to boost performance and observability.

E-commerce Backend Platform (12/2021 - Present)

Technologies : Java, Microservices, Spring Boot, JPA, JWT, Git

- Built scalable backend services for an e-commerce platform handling product discovery, cart, checkout, and orders. Designed REST APIs and optimized read-heavy flows using caching. Added observability and alerts to ensure high availability and quick issue detection.

AI Resume Analyzer (Backend) (12/2021 - Present)

Technologies : Java, Microservices, Spring Boot, JPA, Git, maven

- Backend service that parses resumes and evaluates skills, experience, and job-fit using NLP-based analysis. Exposed APIs for resume upload, scoring, and recommendations. Added caching and observability to improve throughput and system reliability.
